

1. How do I reset my password?

Answer: Go to the self-service portal, choose Forgot password, and verify with your authenticator app. Passwords must be at least 14 characters and are valid for 180 days.

2. My account is locked. What should I do?

Answer: Accounts lock after 5 failed sign-ins and unlock automatically after 15 minutes. If you need access sooner, call the helpdesk and verify your identity.

3. How do I set up multi-factor authentication (MFA)?

Answer: Install the authenticator app, open the security page in the portal and scan the QR code. Keep the backup codes somewhere safe, not on your laptop.

4. How do I connect to the VPN?

Answer: Open the VPN client, choose the nearest region and sign in with your work account and MFA. The VPN is required for internal tools such as finance and HR systems.

5. The VPN keeps disconnecting. How can I fix it?

Answer: Switch to a wired connection or a 5 GHz network, update the VPN client, and pick a closer region. If it still drops every few minutes, send the client log to the helpdesk.

6. How do I request new software?

Answer: Raise a software request in the service catalogue. Licensed tools need manager approval; free tools on the approved list install automatically within one working day.

7. My laptop is very slow. What can I try?

Answer: Restart it (many issues come from weeks without a reboot), close browser tabs, check that disk space is above 15 percent, and install pending updates. If that fails, book a hardware check.

8. How do I report a phishing email?

Answer: Use the Report phishing button in the mail client. Do not click links or open attachments. If you already clicked, tell the security team immediately; it is never too late to report.

9. How do I get a replacement laptop charger?

Answer: Collect one from the IT desk on any floor, or raise a hardware request for delivery.

10. How do I set up email on my phone?

Answer: Install the official mail app, sign in with your work account and accept the device policy. Personal phones are supported if the screen lock is enabled.

11. Can I use a personal USB drive?

Answer: No. USB storage is blocked on company laptops. Share files through the company drive instead.

12. How long does the helpdesk take to respond?

Answer: Urgent issues (nobody can work) within 1 hour; normal requests within 1 working day.
